

## Replicate Master???

Posted by gregloucks@mail.com - 2018/02/07 04:49

---

What option do I choose for making a site identical in every way to the master domain?

Thanks,  
Greg

You can use the JMS Template rules  
replicMasterXXXX  
where XXXX is Domain, Subdomain, Subdir, Multisites

replicMasterDomain when the new site is a domain  
replicMasterSubdomain when this is a subdomain  
replicMasterSubdir when this is a subdirectory of the master  
replicMasterMultisites when this is a subdirectory of /multisites
