Error:-Unable to Upgrade JMS1.3.32 to 1.3.33

Posted by lotustechsol - 2014/10/21 09:43

_____

Error while deploying the patches update JMS1.3.32 to 1.3.33 on joomla 2.5.27
Unknown Archive type

file name in the joomla_roottmp directory is

jms2win_checkupdates_1333.zip"; modification-date="Fri, 03 Oct 2014 13:19:03 +0200"; size=665841

Above JMS file looks like got corrupted.

Please the attachment for the screen shot

_____

We have verified the zip on our server and it is correct. We were able to unzip it.

So, perhaps this is a problem during the transfert of the file.
If you had a problem to just get the patches, you can always download the latest JMS and re-install it over the previous one.
This will include the latest patches.

See the FAQ for the procedure to get the latest version.
https://www.jms2win.com/en/faq/faq-joomla-multi-sites#cat-122
