Error Check run the patches

Posted by alexandro - 2014/11/24 02:32

_____

Dear,

I managed to make the component installation, but following the guidelines of Chapter 3.1 Manual Check patches, tried

Check run the patches , but the error occurs below.

Administrator:
In the configuration file found and no installation code available. Exiting ...

Website:
Warning: require_once (/home/estacaop/public_html/cantinhoDSlibraries/import.legacy.php) : failed to

open stream: No such file or directory in /home/estacaop/public_html/cantinho/includes/framework.php on line 33

Fatal error: require_once () : Failed opening required

'/home/estacaop/public_html/cantinhoDSlibraries/import.legacy.php' (include_path = '.: / usr / lib / php: / usr / local / lib / php') in

/home/estacaop/public_html/cantinho/includes/framework.php on line 33

Can you help me with this problem?

My server is dedicated and it has the following information:

Version MySQLi Database: 05/05/40-cll
PHP Version: 3.5.29
Web Server: Apache
Joomla Version: Joomla! 3.3.6 Stable
The Joomla Platform Version: Joomla Platform 13.1.0 Stable

component:
Version 1.3.17- FULL (Latest available: 1.3.39)
Definition Patches Version 1.3.14 (Latest available: 1.3.35)

Thank you

Alexandro Santos

_____

Based on the version of JMS 1.3.17 that you mentioned, I suggest that you retest that with the latest JMS version 1.3.40.
See the FAQ for the procedure on how to get the latest version.
https://www.jms2win.com/en/faq/faq-joomla-multi-sites#cat-122
