Jms2WinFactory::_createDBO_BasedOnConfig: Could no Posted by jsohler - 2017/10/09 11:12
Hi,
I having issue when creating a cloned slave website. I already set the user to super privileges but still don't work. I think it did not manage to create a user and a database.
See screenshoots: http://prntscr.com/gv31nb
Joomla Version: 3.7.4 Php Version: 5.6.31
Re: Jms2WinFactory::_createDBO_BasedOnConfig: Could no Posted by edwin2win - 2017/10/09 13:13
Do you use the latest JMS 1.3.68 ? In the version 1.3.67, I did a fix to process specific MySQL error code when CREATE IF EXISTS fails.
See change history https://www.jms2win.com/en/faq/change-history-13x
So if you use an older JMS version, please update it. See get latest version for the procedure https://www.jms2win.com/en/faq/faq-joomla-multi-sites#cat-122

So verify if you have the correct MySQL user / password to connect on this DB.

JMS, multisite for joomla - Joomla Multiple Sites and user sharing Generated: 6 December, 2025, 01:25

Also try to enable the joomla debug mode in the "Global Configuration" to get more info and the DB connection and queries.
