Share components

Posted by VDmitry - 2009/01/15 12:44

Hello, I need feature of share some components (modules, plugin) between some sites (created by template). For example, common Bookmarks base for group of sites. Can I do it in current version or are you planning add this feature?

Best regards, Dmitry.

Dear Dmitry,
Sharing is not present in current JMS.
We have developped a specific "Articles sharing for JMS" product that allow to display articles coming from any website defined in JMS.

Concerning you new requirement, this is not planned at short term (not before june 2009) but we will perhaps take it into account in future release or other product.

Thank you for having posted this requirement that will help us in our future development.

With JMS 1.2.x, it is now possible to share the content of a limited number of extensions.
With this Joomla multiple site, you can share:
- The standard ujoomla users;
- Community builder extension
- JomSocial extension
- VirtueMart user or all VirtueMart
- SOBIE2
