Plugin Include for ARE-YOU-A-HUMAN

Posted by schultz - 2014/07/23 11:18

Bonjour Edwin,
you might consider including a new alternative for CAPTCHA into JMS:

http://areyouahuman.com/site-owners/playthru/

This is a really beautiful solution to the CAPTCHA issue, and there is a plugin developed for JOOMLA:
http://portal.areyouahuman.com/installation/joomla

Kind regards
Ruediger

In general, plugin and module can just be defined with the JMS tools menu.
So when they are not declared in the JMS tools, you can define them because the plugin and modules, use the MySQL table of the component.

Here the "Captcha PlayThru" is a pure plugin that does not require any MySQL table.
So you can just define it.

I will add its definition for the next JMS 1.3.34
