Error! Could not find an XML setup file

Posted by bristweb - 2009/01/26 22:04

---

uninstalled multisites per recommendation in a different thread, then tried to reinstall version 1.13

and gott this :(

Warning: zip_read() expects parameter 1 to be resource, integer given in /home//public_html/libraries/joomla/filesystem/archive/zip.php on line 234

Warning: zip_close() expects parameter 1 to be resource, integer given in /home//public_html/libraries/joomla/filesystem/archive/zip.php on line 250

==========

Re:Error! Could not find an XML setup file

found a related post in JCE forums. apparently the zip got damaged. unzipped locally, rezipped, and tried again to install

worked!
