save way to fall back to JMS 1.1.17 to JMS 1.1.18

Posted by KingoftheRoad - 2009/04/03 16:20

_____

I got a problem after upgrading to JMS.1.1.18

I'm not sure whether the problem comes from JMS 1.1.18, just want to fall back to JMS 1.1.17 to check out.

Pls advise me a save way to fall back to 1.1.17 without cracking the system.

Many thanks.

KingoftheRoad.

_____

The idea is to un-install and re-install and older one.
The procedure is un-install the patches and after un-install JMS.
When done, re install JMS 1.1.17 and after re-install the patches.

The JMS slave sites will not be removed.
Therefore their definition will remain available once you will have re-install JMS.
They are saved in the /multisites directory that you can backup if you want to be sure.
