Upgrade to V1.1.21

Posted by FH45 - 2009/05/13 08:07

Hello,

I have today upgraded to the latest version of JMS.

I uninstalled the patches before and install them again after the upgrade.

I am getting the following error messages in check Pathes Installations:

Unable to decompress data,

Error while deploying the patches update.

administrator/index.php
Not OK

* IT IS REQUIRED TO UPDATE WITH A JMS VERSION 1.1.17 or HIGHER.
* You can go on wwww.jms2win.com, login with your account and go in the menu "Get Latest Version".
* Select the Joomla Multi Sites and click on the "Get Latest Version" button in the top right, to receive a new download ID.
* This update is required because it also needs an update of the JMS core
* Use the slave site deployed directory as administrator directory when present. Otherwise use the master website directory

Actions:

* Replace 2 lines by 26 lines in aim to use the slave site deploy directory instead of the master directory
* This allow for example to manage the specific media or image directory from the back-end.

The status information is still as it was before I upgraded:
Joomla Multi Sites version: 1.1.16
Patches definition version: 1.1.10

Our server and Joomla version:

PHP Built on: Linux jclick.jclickcity.com 2.6.9-67.0.7.ELsmp #1 SMP Sat Mar 15 06:54:55 EDT 2008 i686
Database Version: 5.0.67-community
Database Collation: utf8_general_ci
PHP Version: 5.2.5
Web Server: Apache/2.0.63 (Unix) mod_ssl/2.0.63 OpenSSL/0.9.7a mod_auth_passthrough/2.1 mod_bwlimited/1.4 FrontPage/5.0.2.2635
Web Server to PHP interface: cgi
Joomla! Version: Joomla! 1.5.10 Production/Stable 27-March-2009 23:00 GMT

Please help us out on the above problems. :huh:

Thanks and best regards,
FH45

Hello again,

I am not sure why my post is showing up twice.

I had tired to edit it but in edit the post are showing up normal.

First, the title is marked as JMS 1.1.21 but the trace that you give me show that you have JMS 1.1.16 with the patches definition 1.1.10 (the latest one).

As mentionned in the message provided by JMS, to update JMS with version 1.1.21, you have to go on wwww.jms2win.com, login with your account and go in the menu "Get Latest Version".
http://www.jms2win.com/get-latest-version

Select (check box) the Joomla Multi Sites and click on the "Get Latest Version" button in the top right, to receive a new download ID.

This update is required because it also needs an update of the JMS core.

I have also noticed that you are using PHP 5.2.5 that contain several bugs.
This version contain many buffer overflow that could explain some problem during unpack of files.
If you can update your PHP version, this will also be a good point.
You will perhaps see in our JMS change history that we had to re-implement some peace of code to avoid using some mathematical library function that have bugs in PHP 5.2.5.

Hi Edwin,

I followed the way for the upgrade in your FAQ and downloaded the latest update, please see below a

copy of the email from your site:

Below you will find the download ID corresponding to your products.

In case where the URL provided to each product is broken and splitted on several line by your email application, you can go directly into the download area and enter the code provided beside each files.
The download area is
http://www.jms2win.com/download?page=shop.downloads

com_multisites_V1.1.21.zip: xxxxxxxxxxxxxxxxxxxxx
http://www.jms2win.com/index.php?option=com_virtuemart&page=shop.downloads&Itemid=7&download_id=xxxxxxxxxxxxxxxxxxxxxxxx

Please advice.

Regarding PHP 5.2.5 I have asked our ISP to upgrade our servers.

Best regards,
FH45

If you have updated JMS with 1.1.21, the "check for update" is normally not required as it contain the latest version of the patches definition.

The procedure is "uninstall" the JMS patches;
Install the new JMS 1.1.21 using the standard Joomla / extension / install
Re-install the JMS patches.

You should have a JMS 1.1.21 installed and no more a JMS 1.1.16 as mentionned in your previous post.

Hi Edwin,

Done the installation again and good news this time it is working.

Cheers,
FH45
