User Registration Error

Posted by chrisv - 2011/12/14 16:30

All,

Since getting JMS working, now that has brought up another issue...When users try to register, they get the following:

"Notice
info is required. Make sure it contains a valid value!"

Link where occuring:
http://lifejive.com/index.php/register

Any ideas?

I tried to use the link that you provided and I get a blank page when trying to create an account.

Check your "error log" file to get more info concerning a potential "PHP Fatal Error" that perhaps occur somewhere when creating the account.
